

The next best thing to stem cells p 8

## ON THE COVER

Hellhouse Earth, page 36  
 Plan B for biofuels, page 30  
 CSI: Underwater, page 39

Food, and fuel too p 30

## NEWS

## EDITORIAL

The old idea that homosexuality is unnatural is at odds with the evidence 5

## UPFRONT

"Plomei" flims robot; gene building blocks found in meteorite; disease risk from organic pigs; homophobia on trial; NASA may be forced into extra shuttle flight; oil firms can harass polar bears; misconduct coming to a lab near you 6

## THIS WEEK

Reprogrammed cells may offer new ways to rebuild our bodies 8  
 Gay brains are hard-wired 10  
 Junk food leaves marine life starving 11  
 Being bad gets you a male 12  
 Cosmic censor keeps black holes clothed 13  
 Aliens kept cool by laser "demon" 14  
 Smoking gene blocks cocaine reward 16  
 To see cancer more clearly, look scared 16

## INSIGHT

Now the real fight begins over the Yucca Mountain nuclear repository 16

## IN BRIEF

Dr. gonflies trump aircraft designers; Leukemia virus's friendly side; eating can alter your genes; did volcanoes trigger Mars megaflood? 21  
 The benefits of dating at church; gene therapy extends pet dogs' lives; chiropus give hugs of empathy; wildfire extent set to double in north-western US 22

## TECHNOLOGY

Diamonds made from tecuils; first sperm, now "spit"; goggles help soldiers spot dangers 29

## PLAN B FOR BIOFUELS

Biofuels get off to a disappointing start, but the next generation may make them environmental saviours after all 30  
 Quantum secrets can go the distance 32  
 Storing pictures in a cloud of gas 32

## FEATURES

## COVER STORY

WHEN THE SOUTH POLE WAS GREEN... Will the lush, subtropical forests that once covered Antarctica return as the world warms? 34

## BEYOND THE WATERY GRAVE

When a body washes up on a beach it's hard to know how it got there, but a grisly experiment could hold the clue 39

## THE NOISE WITHIN

A burst of random neural hiss works wonders when it comes to sharpening up our perceptions 42

## HOW HARD CAN A PROBLEM BE?

Solve a seemingly mundane postage stamp conundrum and the biggest prize in mathematics is yours 46

## OPINION

## COMMENT AND ANALYSIS

The pain when a speculative economic bubble bursts may bring valuable long-term gains, says Sumit Paul-Choudhury 24

## LETTERS

What makes us special; free trade, or not; drug dangers; ostriches' wings 26

## INTERVIEW

What does the relationship between a woman and her dog tell us about living in the 21st century? A great deal, says Donna Haraway 50

## REVIEW

Ian Hacking welcomes a rigorously rational approach to ideas of race 52

What can we learn from reintroducing Stonehenge, asks Nick Saunders 53

A tour of the relics of the cold war arsenal troubles Richard Rhodes 54

Andrew Robinson on the delights of a history of lost and living languages 55

## BOOKENDS

Crucial carbon; birth of deep time 55

## COMMENTARY: WORLD LINES

A dreadful ignorance is threatening to undermine the education of America's youth, says Lawrence Krauss 56

## REGULARS

ENIGMA 56

FEEDBACK 86

THE LAST WORD 85

JOBS 58

"Fly brains can't function without a little bit of dither – and ours are probably dithering too"

Just add noise to sharpen up your perceptions, page 42
