

## A17 Information for Contributors

## REVIEW ARTICLE

1 **Ultrafast optical parametric amplifiers**

Giulio Cerullo and Sandro De Silvestri

## OPTICS; ATOMS and MOLECULES; SPECTROSCOPY; PHOTON DETECTORS

19 **Application of optical scanner to switching of x-ray photon helicities at kHz range**

Motohiro Suzuki, Naomi Kawamura, and Tetsuya Ishikawa

23 **Transmission of x-ray polarization through glass capillary fibers**

R. E. Benenson, Jianming Bai, and Walter M. Gibson

28 **Direct generation of a tunable nearly transform-limited picosecond pulse in the ultraviolet region using a distributed-feedback dye laser**

D. Q. Hoa, N. Takeyasu, T. Imasaka, and N. D. Hung

32 **A narrow-band wavelength-tunable laser system delivering high-energy 300 ps pulses in the near-infrared**

F. Brandi, I. Velchev, D. Neshev, W. Hogervorst, and W. Ubachs

38 **Algorithms for correcting geometric distortions in delay-line anodes**

Erik Wilkinson, Stéphane Béland, Steven V. Penton, John V. Vallerga, Jason B. McPhate, and David J. Sahnou

## PARTICLE SOURCES, OPTICS and ACCELERATION; PARTICLE DETECTORS

47 **Characterization of a high-intensity unipolar-mode pulsed ion source with improved magnetically insulated diode**

X. P. Zhu, M. K. Lei, Z. H. Dong, and T. C. Ma

53 **Study of electron identification in a few GeV region by an emulsion cloud chamber**

K. Kodama, K. Hoshino, M. Komatsu, M. Miyanishi, M. Nakamura, T. Nakamura, T. Nakano, K. Narita, K. Niwa, N. Nonaka, O. Sato, T. Toshito, and T. Uetake

57 **256-anode channel plate device for simultaneous ion detection in time of flight measurements**

S. Bouneau, P. Cohen, S. Della Negra, D. Jacquet, Y. Le Beyec, J. Le Bris, M. Pautrat, and R. Sellem

- 68 **Physics of the expanding plasma ejected from a small spot illuminated by an ultraviolet pulsed laser**  
V. Nassisi and A. Pedone

#### NUCLEAR PHYSICS, FUSION and PLASMAS

- 73 **Measurement of magnetic field pitch angle using motional Stark effect spectroscopy in the compact helical system**  
Sadatsugu Takayama, Katsumi Ida, Shouichi Okamura, and Shinichiro Kado
- 80 **Martin-Puplett multichannel far infrared heterodyne interferometer on the Helicity Injected Torus II**  
Patrick D. Jewell, Roger J. Smith, and Thomas R. Jarboe
- 88 **Herriott Cell augmentation of a quadrature heterodyne interferometer**  
Erik L. Antonsen, Rodney L. Burton, Gregory G. Spanjers, and Scott F. Engelman

#### MICROSCOPY and IMAGING

- 94 **Apparatus for illuminating the tip-sample interface of an atomic force microscope**  
E. J. Thoreson and N. A. Burnham
- 100 **Simultaneous multicolor fluorescence imaging by scanning near-field optical/atomic force microscopy**  
H. Muramatsu, J. M. Kim, S. Sugiyama, and T. Ohtani
- 104 **Vibration of the cantilever in Force Modulation Microscopy analysis by a finite element model**  
R. Arinero and G. L ev eque
- 112 **Symmetrically arranged quartz tuning fork with soft cantilever for intermittent contact mode atomic force microscopy**  
T. Akiyama, U. Staufer, N. F. de Rooij, P. Frederix, and A. Engel
- 118 **Nonlinear contact mechanics based on ring-down experiments with quartz crystal resonators**  
Steffen Berg, Thomas Prellberg, and Diethelm Johannsmann
- 127 **Method for the study of semiconductor device operation using scanning capacitance microscopy**  
C. Y. Nakakura, P. Tangyonyong, D. L. Hetherington, and M. R. Shaneyfelt
- 134 **Add-on transmission attachments for the scanning electron microscope**  
A. Khursheed, N. Karuppiah, M. Osterberg, and J. T. L. Thong

#### CONDENSED MATTER; MATERIALS

- 141 **Magneto-optical imaging setup for single vortex observation**  
P. E. Goa, H. Hauglin, A. A. F. Olsen, M. Baziljevich, and T. H. Johansen
- 147 **A sensitive 10 T pulsed magnetometer**  
G. A. Kapustin, Y. B. Kim, H. T. Kim, and S. H. Cho
- 150 **High-performance differential surface plasmon resonance sensor using quadrature cell photodetector**  
H. Q. Zhang, S. Boussaad, and N. J. Tao
- 154 **Improved microwave Hall effect measurements method**  
E. Prati, S. Faralli, M. Martinelli, G. Annino, G. Biasiol, and L. Sorba

- 160 **Advanced high-temperature ultracentrifuge apparatus for mega-gravity materials science**  
Tsutomu Mashimo, Xinsheng Huang, Toyotaka Osakabe, Masao Ono, Masamichi Nishihara, Hirotaka Ihara, Masanori Sueyoshi, Koji Shibasaki, Shiro Shibasaki, and Nobuo Mori

- 164 **Kinematic viscosity meter utilizing the phase of pressure gradient variation**  
Ippei Torigoe

#### CHEMISTRY

- 168 **A beam scattering instrument for the dynamics studies of surface-induced dissociation processes**

Anil K. Shukla and Jean H. Futrell

- 176 **Low-shear-rate capillary viscometer for polymer solution intrinsic viscosity determination at varying temperatures**

T. S. Rushing and R. D. Hester

#### BIOLOGY and MEDICINE

- 182 **Wide-field time-resolved fluorescence anisotropy imaging (TR-FAIM): Imaging the rotational mobility of a fluorophore**

J. Siegel, K. Suhling, S. Lévesque-Fort, S. E. D. Webb, D. M. Davis, D. Phillips, Y. Sabharwal, and P. M. W. French

- 193 **Optical workstation with concurrent, independent multiphoton imaging and experimental laser microbeam capabilities**

David L. Wokosin, Jayne M. Squirrell, Kevin W. Eliceiri, and John G. White

#### GRAVITY; GEOPHYSICS; ASTRONOMY and ASTROPHYSICS

- 202 **A low-energy charged particle distribution imager with a compact sensor for space applications**

D. J. Knudsen, J. K. Burchill, K. Berg, T. Cameron, G. A. Enno, C. G. Marcellus, E. P. King, I. Wevers, and R. A. King

- 212 **Development of a spring ring for microchannel plate stack fastening in the cosmic hot interstellar plasma spectrometer detector**

Mario Marckwordt

- 218 **Feedforward reduction of the microseism disturbance in a long-base-line interferometric gravitational-wave detector**

J. A. Giaime, E. J. Daw, M. Weitz, R. Adhikari, P. Fritschel, R. Abbott, R. Bork, and J. Heefner

#### ELECTRONICS; ELECTROMAGNETIC TECHNOLOGY; MICROWAVES

- 225 **Completely explosive pulsed power minisystem**

E. F. Talantsev, S. I. Shkuratov, J. C. Dickens, and M. Kristiansen

#### THERMOMETRY; THERMAL DIFFUSIVITY; ACOUSTIC; PHOTOTHERMAL AND PHOTOACOUSTIC

- 231  **$\pm 30 \mu\text{K}$  temperature controller from 25 to 103 °C: Study and analysis**

P. K. Madhavan Unni, M. K. Gunasekaran, and A. Kumar

- 243 **Low noise temperature control: Application to an active cavity radiometer**

Bruno Guillet, Didier Robbes, and Laurence Méchin
